Emmanuelle,

Yes thanks. I just notice the web page and again thank you for your response.

Jeff

Hi Jeff,

I do not know which of the URC will eventually be regulated. The website I linked to <https://www.epa.gov/dwucmr/fourth-unregulated-contaminant-monitoring-rule>

lists all of the contaminants that EPA will be evaluating. Whether or not they end up being regulated will depend on the results of this study.

Thanks,

Emmanuelle

Please: All data submittals to our office should be sent by email to datamanager@epa.gov with a copy to me (or your project manager in the Drinking Water Office). Data reports are due no later than the **10th** of the month following the month that you receive results, or the **10th** of the month following the compliance period, whichever comes first. Please include the whole lab report and copy of the Chain of Custody. Label with PWS name and number; & source or distribution system location codes or names for data collection points.

Emmanuelle,

Thank You for responding, I have a better understanding of this UCMR 4 now and would you be able to provide me with which unregulated contaminants that may eventually be under EPA regulations? Thanks again,

Jeff

Hi Jeff,

Please give me a call if you'd like to discuss specific questions. I tried calling the first mesa office but was not able to get through.

The following website has more specific information about the rule and the contaminants that you may be sampling for: <https://www.epa.gov/dwucmr/fourth-unregulated-contaminant-monitoring-rule>

Polacca was chosen randomly for sampling and it does not relate to your arsenic non-compliance. The sampling is likely to take place in 2019 and all expenses should be covered by EPA from our Cincinnati office. The sampling is conducted to assist EPA in its evaluation of levels and prevalence of unregulated contaminants in drinking water that may be considered for future regulation.

Please let me know if you have questions or give me a call at the # below. Thanks,

Emmanuelle

Emmanuelle,

Goodmorning, I am just emailing you to see if you can give me a little bit more insight into what this new UCMR 4 is really in regards too? I emailed the address on the notice and I have yet to receive a response from them and I believe we are in the process of registering for the program.

Also, would this be in regards to our continual non-compliance for our PWS# 09-400106? If possible would you please elaborate on this for me? Thanks,

Jeff

Hi Ivan,

Would later in the day be a possibility? I typically am in the office after 9 am (10 am hopi time). Thanks,

Emmanuelle

Hi Ivan,

Yes I would be happy to talk with you about your plans. Please let me know when would be a good time to set up a call. I am in the office this week today, tomorrow and Thursday afternoon. Thanks,

Emmanuelle

Subject: Re: arsenic public notice Dec 2016

We need to talk sometime about why we now support a filtering system on our water system. We think the HEMP Project is still to far in the future when the demand for lower arsenic levels is required now. We have no control and authority over thribal projects and have been waiting all these years. It is important that we have your understandings and hopefully recommendations. We can set up a conference call.

Subject: RE: arsenic public notice Dec 2016

Hello Sharon,

Thanks for speaking with me today. As I mentioned on the phone, the notice should be updated with a more accurate estimate for HAMP completion under the section titled "What is being done?" Public notices for arsenic need to be either mailed or hand delivered to all residents (see the attached instructions for community water systems). Once the notice has been distributed, please complete the attached certificate of distribution which certifies that all notices have been delivered. Please let me know if you have additional questions.

Thanks!

Emmanuelle
